

# SAGAR BHILAWADE

QA AUTOMATION ENGINEER

PUNE, MAHARASHTRA

📞 7841970321 ✉ [BHILAWADESAGAR321@GMAIL.COM](mailto:BHILAWADESAGAR321@GMAIL.COM) [in LINKEDIN-SAGAR](#) [GITHUB-SAGAR](#)

## PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with over **2.5 years** of experience in ensuring **product quality** through comprehensive **manual and automation testing**. Skilled in building scalable **Selenium frameworks** using **Java** and **RestAssured** for API automation, achieving **90% regression test coverage** and reducing manual efforts by **60%**. Adept in the full testing lifecycle, including **functional, regression, smoke, UI/UX, integration, and API testing**, with a strong focus on **test validation and debugging**. Proficient in tools like **TestNG, Maven, Jenkins, Log4j, Oracle, Apache Hive**, and **Selenium WebDriver**. Proven ability to **understand requirements, identify inconsistencies**, and provide an **end-user perspective**. Experienced with hands-on experience in **CI/CD pipelines**, cross-browser testing, and collaborative agile development in an **onshore-offshore model**. Strong understanding of **Software Quality Assurance (SQA) concepts and practices**, and passionate about learning new technologies.

## Technical Skills

**Programming Languages:** Java, Python, SQL

**Automation Testing Tools:** Selenium WebDriver, TestNG, RestAssured, Cucumber, Gauge

**Manual Testing Skills:** Functional Testing, Regression Testing, Smoke/Sanity Testing, UI/UX Testing, Cross-browser Testing, API Testing (using Postman), Swagger

**QA Methodologies:** **Software Quality Assurance (SQA) Concepts**, Test Strategy, Risk Assessment, Quality Metrics

**Agile & Project Methodologies:** Agile Scrum, Sprint Planning, Stand-ups, Sprint Retrospectives, PI Planning

**Test Management & Defect Tracking:** Jira

**Reporting & Logging Tools:** Extent Reports, Allure, Log4j

**Build & CI/CD Tools:** Maven, Gradle, Jenkins, Git, GitHub, GitLab, Docker

**Databases:** Oracle, MySQL, Apache Hive, SQLite

**IDEs:** IntelliJ IDEA, Eclipse, Visual Studio Code

## Experience

### NielsenIQ

November 2022 – Present

*QA Engineer (Manual + Automation)*

*Pune, Maharashtra*

- Responsible for ensuring the **product quality of minor features** by rigorously analyzing requirements, identifying inconsistencies/gaps, and communicating effectively with Product Owners.
- Actively participated in the full project lifecycle, from **gathering requirements and brainstorming solutions** to **testing final applications** and providing an **end-user perspective**.
- Built scalable Selenium frameworks (Data-Driven, POM, Hybrid) in Java for UI and **RestAssured** for API automation, reducing manual testing by **60%** and enhancing overall product validation.
- Automated **300+ test cases** across 5 modules in **CIP-LEGACY-AUTOMATION**, achieving **90% regression coverage** and improving testing efficiency.
- Integrated automated tests with **TestNG, Maven, Jenkins**, enabling efficient CI/CD pipelines and reducing feedback cycles by **70%**.
- Executed comprehensive **web-application and cross-browser testing** to ensure broad compatibility and consistent user experience.
- Performed in-depth **Manual Testing** including functional, regression, UI/UX, and smoke testing, contributing directly to product stability.
- Created detailed **test plans, test cases**, and traceability matrices to ensure comprehensive test coverage.
- Conducted robust **API and Database testing** using **Postman** and **RestAssured**, validating data integrity with **Oracle** and **Apache Hive**.
- Managed defects using **Jira**, coordinating closely with developers to ensure timely resolution and maintaining **test data** effectively.
- Utilized **Apache POI** for test data management and generated comprehensive **HTML, Extent, and Allure reports** for insightful analysis and efficient debugging with **Log4j**.
- Collaborated effectively with other teams in an **onshore-offshore model** for cross-functional requirements, and participated in design/code reviews to ensure quality at every stage.
- Contributed to team knowledge by **educating new hires and team members** on application functionalities, tools, technologies, and processes, fostering a collaborative learning environment.

CIP\_LEGACY\_AUTOMATION | *Selenium, RestAssured, Java, TestNG, Maven, POI, Allure, Extent, Oracle, Apache Hive* 2022 Nov – Present

- Designed and developed a comprehensive automation framework integrating **Hybrid Selenium** (Data-Driven, Page Object Model) for robust UI testing and **RestAssured** for efficient API validation of the CIP web applications.
- Automated **300+ critical test cases** (both UI and API), ensuring **90% regression coverage** across 5 key modules and significantly enhancing overall product reliability.
- Implemented sophisticated data validation techniques for API endpoints against **Oracle** and **Apache Hive** databases, ensuring critical data integrity and consistency.
- Utilized **Apache POI** for effective external test data management, supporting extensive data-driven testing scenarios for complex functionalities.
- Integrated the unified UI and API automation suite with **Jenkins CI/CD pipelines**, enabling automated, continuous testing and faster feedback cycles for development teams.
- Generated detailed and actionable **Allure** and **Extent Reports** to provide clear insights into test execution results, facilitating quick analysis and debugging for improved product quality.

CIP\_PLUTO\_AUTOMATION | *Python, Playwright, Gauge* 2024 Aug – Present

- Leading the development of a new, high-performance automation framework utilizing **Python, Playwright** for reliable UI automation, and **Gauge** for Behavior-Driven Development (BDD).
- Designed and implemented robust end-to-end test scenarios, leveraging Playwright’s capabilities for cross-browser compatibility and speed.
- Established clear, readable test specifications using Gauge, fostering enhanced collaboration between QA, Development, and Product teams.
- Integrated automation suite with **Jenkins** to enable continuous test execution, significantly speeding up feedback on new features.
- Focused on optimizing test execution time and improving overall test suite maintainability, contributing to faster release cycles.
